

# FLASHBACK ARRESTOR

**TYPE 83** Flashback Arrestor is designed to be fitted to the regulator outlet either in single cylinder applications or as an integral part of a pipeline installation.

**TYPE 83** Flashback Arrestor provides complete protection to the operator, regulator and gas supply from the effects of flashback. The **TYPE 83** is of British design.

**TYPE 288** and **TYPE 588** are economical Flashback Arrestors which provide protection to the operator and gas supply from the effects of flashback.

**TYPE 288** is designed to be fitted to the regulator outlet and the **TYPE 588** is to be fitted to the inlet of hand-held gas welding and cutting equipment and machine torches. These devices also act as a **NON RETURN VALVE**.

Product Code	Model	Gas	For	Max Inlet Pressure (Bar)	Inlet	Outlet
K412/103	83	OXYGEN	REGULATOR	10	BSP 3/8 RH	BSP 3/8 RH
