

GAS ECONOMISER

"WeldRo " GS-150 type GAS ECONOMISER enables you to save a considerable amount of gases and your time at continual gas welding, cutting and brazing work. Because once the pilot flame is ignited, you can quickly cut or supply the gases by placing the torch on the hook or removing it from there.

Features

- * With double link structure and for high performance
- * Low cost in simple structure and big energy saving with small cost
- * Free from repeated procedures of igniting, flame adjusting and extinguishing work
- * Easy handling without electricity
- * Comfortable fixed seat to meet user's demand
- * The pilot flame hole is only 0.1mm to save more considerable amount of gases
